### At A Glance

BlueEye is a wearable video technology for paramedics and emergency scene attendants which permits a hospital specialist to see patients remotely, enabling critical pre-hospital treatment. The benefits of this live, point-of-view video are life-saving, cost-saving specialist support in acute situations.

### Benefits

- Improves patient outcomes
- Supports earlier diagnosis and treatment of patient
- Accelerates pre-hospital decision-making and productivity
- Optimises hospital routing decisions
- Increases operational efficiencies in ambulance & hospital service deliveries
- Saves hospital and ambulance resources
- Multiple Cost Savings through higher efficiencies

Wearable, mobile, point-of-view, wireless video for remote medical, public safety and industry applications
